

Swift™ LT

NASAL PILLOWS SYSTEM

LIGHT TOUCH, EASY FIT

From the market leader in nasal pillows, the Swift™ LT is a revolution in nasal pillows technology. Light to the touch, easy to fit and whisper quiet, the Swift LT offers superior comfort, stability and performance to maximize patient compliance.

- **Light touch:** With no forehead support and weighing only 2.3 oz (67 g), the Swift LT seals softly and securely to ensure a comfortable night's sleep.
- **Easy fit:** Rotating barrel allows user to customize seal, and simple design makes it easy to fit and clean.
- **Whisper-quiet comfort:** Quietest nasal pillows system on the market and 71% quieter than the Mirage™ Swift II.*
- **Compact and stable:** Ideal for side sleeping, the Swift LT's mask frame width is 50% of the size of the Mirage Swift II.

Dual-wall nasal pillows

Seals softly for improved stability, comfort and reduced airflow into the nasal passages

Flexible pillows base

Enables the nasal pillows to move multiple directions without compromising the seal

Quiet vent design

Disperses air gently away from patient and bed partner

Flexible lightweight tubing

Minimizes pull on the mask, allowing for more movement while keeping pillows in place

Optional tube retainer

Allows tube to be worn over the head or either side of the face without interfering with side sleeping

Headgear with soft buckle

Allows for easy adjustments

Headgear stability arms

Expandable to accommodate various facial widths, including narrow or wider faces

Patented rotating barrel

Adjusts pillows to the most convenient angle and stays in place to ensure a comfortable and secure seal

TECHNOLOGY HIGHLIGHTS

Rotating barrel with dual-wall nasal pillows

The Swift LT is the only nasal pillows product on the market that features both a patented rotating barrel and dual-wall pillows that can be adjusted to accommodate various nasal angles.

The dual-wall pillows sit on a flexible base, allowing vertical and lateral movement without compromising seal, and are designed to reduce symptoms of dryness by limiting the volume of air entering the nostrils. In addition, the outer pillow inflates with air while the inner pillow offers soft, stable support.

Sound comparison*

With the newly designed vents, the Swift LT is the quietest nasal pillows system on the market.

Testing per ISO 3744: 1994 Acoustics determination of sound power levels of noise using pressure at 10 cm H₂O.

USER BENEFITS

Light touch

- Compact and streamlined design
- Light on the face without compromising seal and stability
- No forehead support necessary

Personalized fit

- Rotating barrel ensures the right fit every time
- Choice of sleeping positions (side & back) with optional tube retainer

Easy to use

- First-time fit with flexible dual-wall pillows
- Easy to clean and assemble

Quiet comfort

- Vent design disperses air away from bed partner
- 71% quieter than Mirage Swift II*

PROFESSIONAL BENEFITS

Easy to fit

- First-time fit for most users
- Three pillow sizes fit over 95% of users**

Cost and time efficiencies

- Reduced inventory with three sizes included in one product code
- Fewer callbacks and fitting/training time

Patient satisfaction and compliance

- Fewer parts for easy cleaning and assembly
- Reduced fitting and training time
- Results in increased compliance and patient satisfaction

Swift LT

Nasal pillows system

(includes 3 pillows sizes: Small, Medium, and Large)
